

# Ex Machina

## A Skylit Drive

Final forewarning has gone through the door  
I have seen this before  
Etch it in my spine; now you think "he's mine" ... for all time  
Overproduce me .. hoping for a dramatic change  
Map out your great escape

What's the connection?  
The slightest deception between you and me  
Man and machine  
Disassemble me ... breathing at your knees  
Your machine

Cut me open; you'll find what you've been looking for  
Helpless in motion; arise to serve me once more

Relaxed movement brings too much pain to be seen  
Overproduce me .. hoping for a dramatic change  
Map out your great escape

What's the connection?  
The slightest deception between you and me  
Man and machine  
Disassemble me ... breathing at your knees  
Your machine

Override command confirmed ... Manual control returned  
Your machine
