

Night Buzz

[John Norum](#)

When it's calling I will be there
Need it more than you will realize
It can take you to the borderline
Always staring through my crystal eyes I only want to live for this night
I can see you on the other side
You look sad

When it's calling me at the end of the night Can you feel the Night Buzz
I feel it, calling from the end of the night
Can you feel the Night Buzz
I feel it, calling from the edge of the sky
From the first time when it hits you
You feel more than you will realize
It can move you, let go down there
Look again before you criticize I only want to live for this night
I can see you on the other side
You look sad

When it's calling me at the end of the night
Can you feel the Night Buzz
I feel it, calling from the end of the night
Can you feel the Night Buzz
I feel it, calling from the edge of the sky
Can you feel the Night Buzz
I feel it, calling from the end of the night
Can you feel the Night Buzz
I feel it, calling from the edge of the sky
