

New Life

[Kathy Mar](#)

Headlines admitting that they just don't know, radio signals in code,
trucks loaded full with important men, but a barricade on every road,
There hasn't been any message in or out of the city in a week or three,
But there's nothing gone wrong with the city, they're just setting the city free

They're taking people to a new life, new life, new life,
people to a new life, new life, new life,
people to a new life, new life, new life, somebody take me

have to wade deep to the lodge, and the lodge is full tonight
the general consensus seems to be that staying here serves up right
that the people who know and the people who care don't ever seem to be the same,
and if that spaceship of angels is really there, we all wonder why they came

They're taking people to a new life, new life, new life,
people to a new life, new life, new life,
people to a new life, new life, new life, somebody take me

General's picture's in the paper today, he's a powerful looking man,
He's got thousands of men, he's got total control " he's got everything except a plan,
If the men don't rust and the weapons don't run there's no way that we can lose the war,
They came in peace, they were met with bombs
But what are we fighting for?

They're taking people to a new life, new life, new life,
people to a new life, new life, new life,
people to a new life, new life, new life, somebody take me

They're taking people to a new life, new life, new life,
people to a new life, new life, new life,
people to a new life, new life, new life, somebody take me
