How We Know

The Thermals

You spoon water like love and I will take it
If you can take it

This is how we know
This is how we go
This is how we know

I don't know what to say
When you're so far from me I can barely make you
I count two two three
Breathe two three

You spoon water like love and I will take it
If you can take it

You spin circle in verse and I will take it
If you can take it

This is how we go

Soft and slowly, don't you know me
Know I count two, I count for you
Given the thought I would have you again
I count two two three, breathe two three

You walk alone, you talk in code
It's a light I can't decipher
But eyes shut is somehow enough
Under trick lighting
Under trick eyelids

Given the thought I would have you again
I count two two three
Breathe two three

You spoon water like love and I will take it
If you can take it

This is how we know
This is how we go

This is how we know
