Take a Photograph

Dropping Daylight

On the phone
Its handles hot from messages you left
Askin' us
To question all the moments that we spent
Breakin' bones
And teaching every melody to cry
Maybe its too late to runKeep it all
Youre losing out
So take a photograph to capture every scene
What this is
And what could've been
Never seem to justify the means until the endWe need to vent
To keep ourselves from loosing our face
Heaven sent
To burn the absent-minded from this place
Suck a stone
And fill the ground with desperate alibis
Scared to fall and fade awayKeep it all
Youre losing out
So take a photograph to capture every scene
What this is
And what could've been
Never seem to justify the means until the endLeave a message
Im not here to answer
If you need to reach me
Then just take a number
(2x)Keep it all
Youre losing out
So take a photograph to capture every scene
What this is
And what could've been
Never seem to justify the means until the end
(2x)Keep it all (leave a message)
Youre losing out (Im not here to answer)
So take a photograph (if you need to reach me)
To capture every scene (then just take a number)
What this is (leave a message)
And what could've been (Im not here to answer)
Never seem to justify (if you need to reach me)

The means until the end (then just take a number)
