

May You Be the Road

Bedouin Soundclash

The road we walk is glitter and gold
Some may be a friend and some be a foe
If I'm coming from the cold, could you be my road
May you be my road, may you be my road
Trouble like a fist
in the land
Beating to the heart of a man
Love is all you need in the end
But you find you get something else
Cause the road we walk is glitter and gold
Some may be a friend and some be a foe
If I'm coming from the cold, could you be my road
May you be the road, may you be the road
So in life we'll all
search for gold
Looking under old skulls and bones
Darling don't you feel so alone
Together we can both build a home
Cause the road we walk is glitter and gold
Some may be a friend and some be a foe
If I'm coming from the cold, could you be my road
May you be my road, may you be my road
Could you be my
road, may you be the road
Could you be my road, may you be my road
May you be the road
