

# Spaceship Races

Carole King

Baby, you're so frazzled  
Spinnin' around in a busby swirl  
With all that razzle dazzle  
I know at heart you want a down home girl Oh, you know I want to take you to the spaceship races  
Watch them do a few laps around the sun  
But if you don't go in for far out places  
I'll take you home with me when the day is done Baby, you're so scattered  
Your span of attention is shrinkin' fast  
Your brain's been battered  
By all the disappointments of the recent past Oh, you know I want to take you to the spaceship races  
Watch them do a few laps around the sun  
If you don't go in for far out places  
I'll take you home with me Didn't I see you walking on main street  
Lookin' in windows waitin' by turnstiles  
Thinkin' of things you thought you'd like to buy Livin' off dreams stored up in film cans  
Lookin' at screens just waitin' your turn while  
You looked up and saw a rocket in the sky Oh, you know I want to take you to the spaceship races  
Watch them do a few laps around the sun  
But if you don't go in for far out places  
I'll take you home with me when the day is done  
When the day is done
