Blame

Cavo

Said you'd always feel like
Then everything just changed in the blink of an eye
And I could never leave like
There was anything left to leave behind
You were right there and I was lonely
And I could let you down
Someday you'll say there's always been a part of me
Feeling like my heart is so far away
Searching for a part of me, looking for somebody to blame
Said you'd always be around
Then you leave it all out on the line
And I'd tear it all down
Just to watch you change what you know was right

You were right there and I was lonely
And I could let you down
Someday you'll say there's always been a part of me
Feeling like my heart is so far away
Searching for a part of me, looking for somebody to blame
I need you to hear everything I wanted to say
Someday you'll say, there's always been a part of me
Feeling like my heart is so far away
Searching for a part of me, looking for somebody to blame
Somebody to blame
Searching for a part of me, looking for somebody to blame
