## Switchblade Knife

## **Pro-Pain**

Rise and shine, get out of bedAnd I'm a warmachine againBeat my meat a few times and It's best to watch your backI am feeling mean my friendMe, myself and I'm comingYou are mine and I'm gunnin'I swear I'll beat you blackI'm gonna get you and leave you for deadAnd I'm gonna beat you with a blow to the headYou'll never forget me for the rest of my life

Cause I am gonna cut you like a switchblade knifeFeed the fire cause I'm waitingMy fist will break your faceFind your house and I'll take it and ransack the placeFear itself is still looking to shut you up for good It's your life and I'll take itI'd kill you if I couldStrange thoughts are going out of my brainStanding naked with a knife in the rain

Got my fix, now I'm feeling alrightNew York's so pretty at this time of night
