Get It and Go

KLOOZ

We talked all night about suicide
And she said, "If this is living
How come I never feel alive?"First time you're there
Well, it gets you up
Second time alright
But its just not enough, noIt shoots through your veins
Tears all you nerves apartWell, you get it and go
You get it and go
You know it's alright
You know it's alrightYou get it and go
You get it and go
You get a little high
And you get a little lowI've seen you there so many times
You had your hands in your pocket
You said, "I've just got this message on my phone
And it's blowing my mind
You know its tearing me up inside out"Strangles me, strangles me
You know first time you're there
Well, it gets you up second times alright
But it's the second circle of hell in your mindIt shoots through your veins
It tears all you nerves apartOh, you get it and go
You get it and go
You know it's alright
You know it's alrightYou get it and go
You get it and go
You get a little high
You get a little lowYou get it and go
You get it and go
You know it's alright
You know it's alrightYou get it and go
You get it and go
You get a little high
And you get a little lowWell, if it's all so hard
Why don't you slide on down with me
And if your hanging on my words
Well, that's alright with meBecause its just so easy
And we'll be alrightYou get it and go
You get it and go
You know it's alright

You know it's alrightYou get it and go
You get it and go
You get a little high
You get a little lowYou get it and go
You get it and goYou get it and go
You get it and go
You know it's alright
You know it's alrightCount your fingers to four
One, two, three, four
And that's it
