

I Wanna Be With You

Avalon

I want to tell You
Things I've never told
And take You into
The center of my soul
I want to run through
The fields of Your imagination Under the blue skies,
You're the golden sun
The light in my eyes,
I know You are the One
See where my heart lies
As You guide me through the shades of gray Along the way
I will hang on every single word You say
And never live to see my dying day
I'd walk the aisle
A million miles
To see You smile I want to know how it feels to believe in something
Riding on the heels of a good thing coming
Run to the one thing I know is something true
I want to be with You Want You to show me
The wonder of the word
Want You to hear me
Like no one's ever heard
You have and hold me
Leading me out of the darkest night Into the light
And never has it ever been so right
And from this moment on You are the sight
I can't erase
I close my eyes,
I see Your face I want to know how it feels to believe in something
Riding on the heels of a good thing coming
Run to the one thing I know is something true
I want to be with You Every day, every night
For the rest of my life
I want to be where you are
'Cause You're never very far away
I always want to be with you I want to tell You
Things I've never told
And take You into
The center of my soul

I want to run through
The fields of Your imagination I want to know how it feels to believe in something
Riding on the heels of a good thing coming
Run to the one thing I know is something true I want to live my life like I hold the meaning
Deep inside my soul I hear the music screaming
Eyes wide open I'm awake and dreaming, too
I want to be with You
I want to be with You
