

Just So You Know

HOLLY PALMER

1 2, 1 2 3

I'm telling you something
I'm telling you something Tell me baby
If maybe we could put the top down
The sun is flying so high today
And the shine off your cherry fenders
Would be too much but not too much
With your hand reach out
With your mouth shape the phrase
And say Just so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together With your eyes look over
With your car pull over
That's all it's gonna take
'Cause I have been
Paying very close attention to your habits
Somebody over there at the counter
In the diner on the corner in the corner of my mind
Wears your face On a different day
I am someone else too
And we disappear together
We fold up and fly away
Like paper airplanes
We rub each other's creases
And line up each other's angles
And we choose the brightest papers and we fly Just so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together Just so you know
Just so I know

Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're togetherAnd we could really take our time
We could really get our shapes just right
And fly off each other into the night
And where we land is out of our hands
And so in this way we don't stop
We never stop
We don't stop
We won't stop babyJust so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're togetherJust so you know
Just so I know
Just so we know
We're together
If I can look in your eyes
And see what I feel then it's real
And I know
We're together
