

Takotsubo

Love, Robot

I was never so sure
Why pineapples you belong here
You cannot convince me
If I could only disappear (watch me go)
I don't belong here (just watch me go) If I could try to stop it
I could try my hardest
Things I know the most are
Propelling me the farthest (watch me go)
I don't belong here (just watch me go) Pace the floor to the door to the phone
Pace the floor to the door
I'll just go
Pace the floor to the door to the phone
Pace the floor to the door
I need to be alone Why did I need to make such a scene
As if I thought it was going to help me
I thought leaving was my only choice
I can't face the life I had before LE SHRED (DED CHEESE)
And now my body is as empty as the bed behind me
I was never so sure until I packed my bags to leave
This place was killing me
But you are the ... like bombs
The weapons in war inside me
Maybe I could make a home for myself
In a place without anybody else
And now my heart I left behind will have to come and find me It didn't hurt less
I just couldn't feel it
It was self defense Pineapple-fest I was never so sure
That I did belong here
You could not convince me
To live my life filled with fear (watch me go)
I kept my heart here (watch me go)
I kept my heart here I was never so sure
Until I packed my bags to leave
You run away would kill me (watch me go)
I kept my heart here
