

# Break the Clouds (Remastered)

## Eyeshine

Together we can break the clouds  
I wonder if we'll figure it outTo my surprise  
    The stars will show it  
        Still in the night  
        I got to know itSo stand up  
            don't take it  
        There's very little time to make it  
            Come on, Come on  
        It's our chanceTogether we can break the clouds  
        I wonder if we'll figure it outBurns like a fire  
            If you control it  
                Bring down the walls  
                If you spoke itSo stand up  
                    don't take it  
        There's very little time to make it  
            Come on, Come on  
        It's our chanceTogether we can break the clouds  
        I wonder if we'll figure it outWhat we are running from  
            Is the truth  
                It's the truth  
                Our lives are ruined under here  
                Under hereWell alright, alright  
                I'll light the fire inside of me  
                    Well alright, well alright  
        We'll light the fire inside of usTogether we can break the clouds  
            I wonder if we'll figure it out  
                Together we can break the clouds  
                    I wonder if we'll figure it out
