

It's Mine

Eleanor McEvoy

I'm out of my league, I've done it again
Can never tell where, can never tell when
Just when I swore, I'd had enough
Electricity's flying and I'm lit up And I know, and I know, and I know
I know I've been through this before
Here I go, here I go, here I go
Here I go again, you're on my mind I want to feel you, put your hands through my hair
I want to feel a little fun in the air, we can share
All I need is just a piece of you time
And well maybe a bottle of wine If it's early we can go on the town
If you want to we can stay at home and just settle down
Either way I need a piece of your time
And it's mine, and it's mine, and it's mine They're widening their eyes, they're looking askance
They're saying is this some new romance?
Others are claiming, they knew all along
You could tell there was something going on And they know, and they know, and they know
They know it's none of their concern
There they go, there they go, there they go
There they go again but we don't mind I want to feel you, put your hands through my hair
I want to feel a little fun in the air, we can share
All I need is just a piece of you time
And well maybe a bottle of wine If it's early we can go on the town
If you want to we can stay at home and just settle down
Either way I need a piece of your time
And it's mine, and it's mine, and it's mine And it's mine, yeah
And I really want it to be
'Cause you're fine, yeah
Yeah you're fine with me, with me You hear what I'm saying loud and clear
You hear what I'm saying when I'm not even near
Now don't you flit with me like that
My heart's already thumping 'Cause you know, yes you know, yes you know
You know how wild you're driving me
There you go, there you go, there you go
There you go again but never mind I want to feel, you put your hands through my hair
I want to feel a little fun in the air, we can share
All I need is just a piece of you time
And a bottle of Beaujolais wine If it's early we can go on the town
If you want to we can stay at home and just settle down
Either way I need a piece of your time

And it's mine, and it's mine, and it's mine
