

# With You

## Teenage Fanclub

I will walk with you through darkness  
And see what we can see  
I will hide with you from sadness  
And bad philosophy  
I will laugh with you at madness  
And learn stupidityThe world is wrong, the world is right  
And you are right and you are wrong  
And life is short and life is long  
With you I see it  
Who knows what we would see  
Who knows what we might find  
Step over a fallen tree  
And beware a fallen mindThe world is wrong, the world is right  
And you are right and you are wrong  
And life is short and life is long  
With you I see it  
The world is wrong, the world is right  
And you are right and you are wrong  
And life is short and life is long  
With you I see it
