

# Heart Hope (Matthew Heyer Remix)

## Oh Wonder

They're building towers that are high enough to see the clouds  
But it don't bother me  
The elevators working overtime up and down  
Yet it don't bother me Cause I need something more than everything  
A higher self deep within  
Cause I need something more than everything  
A higher self, a higher self And I know we need a little heart hope  
I know we've gotta outgrow and feel a little heart hope They're building aeroplanes faster than the speed of light  
Yet it don't bother me  
The endless cities multiplying out oceansize  
Yet it don't bother me Cause I need something more than everything  
A higher self deep within  
Cause I need something more than everything  
A higher self, a higher self And I know we need a little heart hope  
I know we've gotta outgrow and feel a little heart hope  
Cause there is something more than everything  
So feel the love and let it in  
Cause I know we need a little heart hope And I know we need a little heart hope  
I know we've gotta outgrow and feel a little heart hope  
Cause there is something more than everything  
So feel the love and let it in  
Cause I know we need a little heart hope
