Can't Go Wrong

Phillip Phillips

I've seen the lights come from the flashes in the dark
I feel like a blind man trying to make a start
And I don't know, no I don't know
Where I'm gonna goI've seen the sun come up a mile of the ground
Flew back the other way and saw it go back down
I know the days changed but always seem the same
I'll take the best of what I can from my mistakes
And now I know, now I knowI can't go wrong, as long as I remember where I'm from
Hold my head up just to keep it clear
I want a chance just to face my fear, face my fearNevermind all the times that I just couldn't wait
I cant remember when it all began to change
Watching the grass grow and die from summer to fall
It's funny how the year passes by and you don't notice at all
I know, I knowI can't go wrong, as long as I remember where I'm from
Hold my head up just to keep it clear
I want a chance just to face my fear, face my fearI can't go wrong, as long as I remember where I'm from
Hold my head up just to keep it clear
I want a chance to face my fearI can't go wrong, as long as I remember where I'm from
Hold my head up just to keep it clear
I want a chance just to face my fear, face my fearI can't go wrong, as long as I remember where I'm from
Hold my head up just to keep it clear
I want a chance just to face my fear, face my fear
