Braid

ambinate

Eyes cast into the night
Searching for someone
You needn't stare so long
It's time enough for us
To fall into dreamsNo hands covering your kiss
Everything is heaven
The surface never stops
The sky was all lit up
The stars in grey shout out
To carry in my loveThere's a star up here
All alone, all alone
And it looks through your tears
My love, my love
Save me, say to me
I am yours, I am yours
