I Will Find You

O.A.R.

In the cut of the night
Driving heavy on River Road
Looking to find I just want to move things along
I don't want anyone's life
Just getting to know my own drive, drive, driveWhoa, whoa, midnight came
You're at the window I'm in a frame
And the truth is all that remains
I will find youI will find you
I will find you
I will find youFoot on the floor, heading straight for the county line
City's no good, in the shadow you leave behind
Mama said follow the stars but I ran out of country road
Drive, drive yea I driveBut the truth will split you in two, gotta find you!
I will find youI will find you
I will find you
I will find you
I will find youI've got toI will find youNothing will break us apart
Neither the miles or stars
All I know in my head, in my soul
There's only two, there's me and you
I will find you
I will find you
I've got toI will find youOften summer rains just can't wait to fall
From underneath the tired atmosphere
Me I'm in a plane, watching empty cars
Fall into the ocean disappear
But I can't tell if this is real
Are those mountains made of steel
Am I on my way to everything that I want or am I here
Inside the town where I was raised
We turned and walked away
Better to be lost than without youWe're all meant to be, shoreline at our feet
Waiting on a wave to run into
Then out beyond the reef, the current pulled us deep
But I fought for you
The sun that turned to night, you disappeared and I'm
Left waiting on a clue, the air I'm cutting through
I can find you!
I will find you

I have got to
I will find youFind youI've got this woman and she needs me bad
But she don't know
I crossed the world but
It crossed me back
All night long, to a time wandered like a fool
Then one night, I fell in love with youI got this woman yeah she's so damn bad
But she don't know, I'd do anything to get her back
All night oh
To a time, wandered like a fool
Then one night, the sounds you heard were true
Oh, they are true!
Ooh, I found you!
I found you, you!
Yeah, yeah yeah yeah yeahHey just keep believing, hey just keep believing,
Hey just keep believing, I found you
Hey just keep believing, hey just keep believing,
Just keep believing, I found you!
Hey just keep believing hey just keep believing,
Hey just keep believing, I found you
Hey just keep believing, hey just keep believing,
Hey just keep believing
I found you!Hey just keep believing, hey just keep believing, hey just keep believing
Hey just keep believing, hey just keep believing, hey just keep believing
Hey just keep believing, hey just keep believing, hey just keep believing
Hey just keep believing, hey just keep believing, hey just keep believingHey just keep believing, hey just keep believing, hey just keep believing
Hey just keep believing, hey just keep believing
