Big In America

The Stranglers

I met a roach in America
His family had a massive tree
They live just about everywhere
He was big in America
He was big in AmericaI met a vet in America
He was alive, he was in overdrive
He'd just been around everywhere
He was big in America
He was big in AmericaAnd when you're big in America
You like to live in America, you won't be on your own
And since you're big in America
You might as well make America your home, big in AmericaI met a girl in America
She wore the pants cross the big expanse
She was whipping men everywhere
She was big in America
She was big in AmericaAnd when you're big in America
You like to live in America, you won't be on your own
And since you're big in America
You might as well make America your home, big in America
Big in America, big in America, big in America
