Phantom Limb

Tourniquet

The case of George Dedlow
Double amputee, one of 500,000
Civil War casualties
Suffered a phenomenon so bizarre
Even the doctors looked on from afarHow can you feel a leg that isn't even there?
From cold to burning heat
To pain beyond compare
Clinically known as phantomb limb
So hard to treat, prognosis dimBrachial plexus avulsion
They told you cycles were dangerous
Nerves ripped from the spinal cord
You certainly need the LordBut just like the feeling in your arm that is gone
You've severed communication with Him all along
Even though you know it's totally wrong
Spiritual death kicks off its swan song
