Come With Me If You Want to Live

Austrian Death Machine

I am here to save her life
Because you told me to
And I must obey my... obey my master
Even when danger strikes
T-1000 is here
He knows where to find us
So you must come with me now
Come with me if you want to live
Come with me if you want to live
We must run
We are no match for him
He was made to be superior to me
But the chase will end soon
We are good
And this is a hollywood movie
Come with me if you want to live
Come with me if you want to live
Come with me if you want to live
Come with me if you want to live
I was once sent back to kill you
But now I'm here to save your life
I was once sent back to kill you
But now I'm here to save your life
I'm back - to save your life
I'm back - to save you
I'm back - to save your life[guitar solo]Come with me, if you want to live
Come with me, if you want to live... go!
The choice is yours but we must go now
You would be dead already
If that was still what I was programmed to do
Come with me, if you want to live [x3]
Come with me, if you want to live.. live.. live
