

# Move On

INXS

Mmm  
Yeah, yeah  
Hey!  
Shake, shake, shake it There's a monkey on my back  
Been there much too long  
Every time I kick it off  
Another one comes along Used to be in another world  
I used to be alone  
It's so hard to be yourself  
When you feel like something's wrong There are no words that could explain  
The strongest love in vain  
There are no words that could explain  
The strongest love in vain Move it  
Move on There's a question in my head  
Been there all night long  
Well, I toss and turn inside my head  
But I won't let it tear me down Used to be in another world  
I used to be alone There are no words that could explain  
The strongest love in vain  
(Oh, you gotta move on) There are no words that could explain  
The strongest love in vain  
There are no words that could explain  
The strongest love in vain Had enough, oh  
Gotta move on, yeah There are no words that could explain  
The strongest love in vain  
There are no words that could explain  
The strongest love in vain There are no words that could explain  
The strongest love in vain  
There are no words that could explain  
The strongest love in vain
