

Strawberry

Everclear

NowNever been here, never coming back
Never want to think about the things that happened today
Wanna lay down on the warm ground
Think I'm gonna need a little time to myselfDon't fall down now, you will never get up
Don't fall down now, don't fall down now
Don't fall down now, you will never get up
Don't fall down now, nowI ask you for a slow ride
Going nowhere, you look like Satan
You ask me if I want to get high
Couple of bags down in old town
You tie your arm, ask me if I wanted to driveDon't fall down now, you will never get up
Don't fall down now, don't fall down now
Don't fall down now, you will never get up
Don't fall down now, now, nowLast thing I recall, I was in the air
I woke up in the street crawling with my strawberry burns
Ten long years in a straight line, they fall like water
Yes, I guess I fucked up againDon't fall down now, you will never get up
Don't fall down now
Don't fall down now, you will never get up
Don't fall down nowDon't fall down now, you will never get up
Don't fall down now
Don't fall down now, you will never get up
Don't fall down now, now, now, now
