

# Easy Answers

## Worth Every Scare

"Easy Answers" 16 kid and just in the scene  
But you've learned you have to play their games  
Sold out through the chemical route because its easier to pass the blame  
Instead of listening they pawn it off on someone else  
To try their hands at easy answersTake these push the buttons and tweak  
Manufacturing a new disease  
Lump sums making zeros and ones  
As your forced into dependency  
Instead of listening they pawn it off on someone else  
To try their hands at easy answersGiving up and taking it back to  
Square one every morning  
And you can't get out of bed  
Daily rush to reformat again  
Going through the motions  
Forget and fall back down  
Normal's not the norm you're used to now  
Instead of listening they pawn it off on someone else  
To try their hands at easy answersGiving up and taking it back to  
Square one every morning  
And you can't get out of bed  
Daily rush to reformat again  
Going through the motions  
Forget and fall back down  
Normal's not the norm you're used to nowClimbing up a wall that never ends  
Close your eyes  
Swallow and give in
