Glacially

Asobi Seksu

Follow me wherever we are going
Hold your breath I'm running up these stairs alone
Even we will grow up and be lonely
Having a miss for hopes and places we belongHushed in silence we lose our way in the dark
Starting, stepping we keep going too far
A crash is flowing while my heart is sinking in place
Hushed in silence we get up losing our waySneak away for talks out on the hillside
When you go home I'll look for where you're hiding
Even when we grow up and are lonely
Hold your breath, I'll run to where you're calling meHushed in silence I lose my way in the dark
Starting stepping we keep going too far
A crash is flowing while my heart is sinking in place
Hushed in silence we get up losing our way
