

# Atomica

## Wolfgang

It started as someone's dream  
To make a better day  
No one had foreseen  
What that dream became

Step by step we marched ahead  
Never looking back  
The future's always brighter  
Next to the remnants in our tracks

Stupid ignorant little child  
You always lose your way  
And all the souls in heaven  
Will never make your day

So cross by cross in life to lie  
You plant your father's faith  
And now the holy trinity  
Can see your kind erased

Pledge allegiance unto Marx  
The workers off to war  
Your bonded brothers under red  
The sickle hammer star

Brick by brick they built their wall  
To watch it fall down  
And to every brick there was a life  
Their history scattered on the ground

Atomica, yeah  
This is atomica

What a monster man and his machines  
All the good that he could do  
He saved himself from himself  
But he don't want to

So bolt by bolt and chain by chain  
He built his lethal thrill

And one day soon he'll have no choice  
But to drink his bitter pill

Atomica, yeah (yeah)  
This is atomica

Oh, my darling little one  
If you only have learned  
Now all your time spent under the sun  
You might have well been burned

So on we go through bitter times  
Who'll be left to mourn  
We lost ourselves our dignity  
That we worked so hard for

Atomica, yeah (yeah)  
This is atomica

Oh, we're at a new millennia
