

# No Return

## Gamma Ray

I'm riding the wind, don't need your request  
You'd never invite me but I will be your guest

    Oh no, no don't be afraid of the reaper

It's time to go I call your name and you follow, fly with meTake a look around and say you love me

    And I will guide you through the golden door

    For everything you'll see there is a reason

    The big wheel is turning like always beforeThere is no return from the other side of heaven

For the big wheel turns and the circle must go on, forever moreHow do you like your termination day? So far

    Kiss me good bye 'cause I must fade away

    Oh no, no, don't be afraid of your master

It's time to go it's calling your name now you follow, fly awayTake a look around and say you love me

    And I will guide you through the golden door

    For everything you'll see there is a reason

    The big wheel is turning like always beforeThere is no return from the other side of heaven

For the big wheel turns and the circle must go on, forever moreWelcome to eternal life, my friend

    Now take your seat on your cloud

    Enjoy your stay but always remember

    There is no returnThere is no return from the other side of heaven

    For the big wheel turns and the circle must go on, forever more

    There is no return from the other side of heaven

    For the big wheel turns and the circle must go on, forever more
