

Watching Over You (Overwatch Song)

NerdOut

We come together, we ready for action
Ever since Omniums started producing killers
Pick a side, pick a truth, pick a faction
In every war there's gonna be losers and winners
We fight for what we believe in
We are a collective international task force
You can join into this elite legion
If you need a hero then this is what you asked for

Soldiers, scientists and guardians
Come against peace? Zero tolerance.
Defenders watching over the populace
The world needs us we're overwatching them
Attack the opposition, we're stopping them

Stand back to back, it's total dominance
Defenders watching over the populace
The world needs us, we're overwatching them

You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
Watching over you

We are fighting against destruction
Whether apart or solo we coming to get it
Enemies of the world we crush them
Some do it for peace, others do it for vengeance
It's a new world revolution
All those robotic, hypnotic products get wasted
The Overwatch is the only solution
No second guessing when we protecting the nation

Soldiers, scientists and guardians
Come against peace? Zero tolerance.
Defenders watching over the populace
The world needs us, we're overwatching them

Attack the opposition, we're stopping them

Stand back to back, it's total dominance
Defenders watching over the populace
The world needs us, we're overwatching them

You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
Watching over you

Need a hero, when you need us
We'll be right there, We'll be watching over you
Need a hero, when you need us
We'll be right there, we'll be watching over you
Need a hero, when you need us
We'll be right there, we'll be watching over you
Need a hero, when you need us
We'll be right there, we'll be watching over you

You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
You have a voice, when you think that nobody cares
And don't know what to do, there's a choice
Call on your hero's, we'll be there
Watching over you
