Did We Live Too Fast (Instrumental)

Got A Girl

Sipping my vodka tonic in your leather-back chair
I put on my makeup perfect, but I let down my hairAnd while you're at your party
I wait here patiently
And darling don't you worry, I know
Not to upset the queenDid we live too fast in this fantasy?
Sandcastles were the walls we made
Did we live too fast in this fantasy?
The tide comes and it drifts awayTomorrow we'll meet at the plaza in our regular suite
Tonight I know you'll remember just how much you need meI'm sure she's very lovely
But aren't I just as nice?
I know that I'm so young and naive
You don't have to tell me twiceDid we live too fast in this fantasy?
Sandcastles were the walls we made
Did we live too fast in this fantasy?
The tide comes and it drifts awayMy days don't matter, only my nights
My heart you can shatter, I gave you the right
And it's not a game like you always say
And yet all the same, by your rules I playI love your hellos, but I hate your goodbyes
I could strangle you some days for how you've made me cry
And yet here I sit, special place for two
You've got me here now, I'll never really have youDid we live too fast in this fantasy?
Sandcastles were the walls we made
Did we live too fast in this fantasy?
The tide comes and it drifts awayDid we live too fast in this fantasy?
Sandcastles were the walls we made
Did we live too fast in this fantasy?
The tide comes and it drifts away
