Your Love Kills Me

The Veer Union

Feel you run right through my veins
Can't get enough, my heads in a haze
Addicted to you
You're my disease, take over me
I burn like the sun, sway like the sea
You're a loaded gun pointed at me
Addicted to you, you're what I need
You're my disease, take over me
But I've had enough and now I finally see
It's time for me, it's time that I try to move on
Before your love kills me
And I'll break free from all of the damag you've done
Before your love kills me
I slowly drown as you pull into me
I swallow it down, I'm in way to deep
Addicted to you, you're what I need
You're my disease, take over me
But I've had enough and now I finally see
It's time for me, it's time that I try to move on
Before your love kills me
And I'll break free from all of the damag you've done
Before your love kills me
I will leave it all behind me
The memories of you remind me
I have to let go 'cause you dug me this hole
You've taken more than you know so I have to let go of you
It's time for me, it's time that I try to move on
Before your love kills me
And I'll break free from all of the damage you've done
Before your love kills me
It's time for me, it's time that I try to move on
It's time that I try to move on
I have to let go 'cause you dug me this hole
You've taken more than you know so I have to let go
I have to let go 'cause you dug me this hole
You've taken more than you know so I have to let go
