

# Predator and Prey

**Barb Barton**

Predator and Prey (Barb Barton) D

Youâ€™ve spent the last few years you know, trying to understand  
The reasons for the nights alone, without a tender hand  
To caress your skin, to touch your face, to give a warm embrace

I know your heart is full of love just waiting for the day  
When that special someone says sheâ€™s really here to stay  
But my friend there is something you must learn something I must say

Youâ€™ve loved the same girl all your life she just wears a different face  
You chase her until you fall down but sheâ€™ll always win that race  
Itâ€™s an age old game that lovers play the predator and prey

Fell in love with your doctor then a girl whoâ€™s half your age  
Youâ€™ll fall in love with anyone who can easily turn the page  
Wonâ€™t find the stars in a cloudy night, just get lost along the way

And I know your heart is full of love just waiting for the day  
When that special someone comes along to carry you away  
But the years are slowly slipping by baby canâ€™t you see?

Youâ€™ve loved the same girl all your life she just wears a different face  
You chase her until you fall down but sheâ€™ll always win that race  
Itâ€™s an age old game that lovers play, the predator and prey
