Every Part Of Me

Victoria Beckham

When I look into your eyes
People always talkin' 'bout, people always run their mouth
But when I hold you there's no doubt, my love for you is true
Before my life was ups and downs and happiness
I used to chase around
That's why, I'm glad you came 'cos now, there's no substitute
And I don't care, whatever may come our way
It's you and me, forever and ever to be 'cos
When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you
When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me
I've seen how easy things can change and people never stay the same
But baby, ever since you came, you made me feel secure
Yes, I think you should know that people gonna come and go
Be assured of this one thing, I will still remain
And I don't care, whatever may come our way
It's you and me, forever and ever to be 'cos
When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you
When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me
I know that there will come a day when you have to go away
But you have no reason to fear, I promise I'll be here
If someone ever [Incomprehensible] your heart
And you feel your world is torn apart
My love for you will bring you through hard times
I'll help you be strong
When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too

'Cos I'll always be a part of you
When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me
When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you
When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me
Every little part of me, you're every little part of me
You're every little part of me
Every little part of me, you're every little part of me
