First Day

Astre

Let's get in some shit because we lit,
girl now we talking
lets cruise in the city in the whip
you don't do this often
fuck your man I don't care who you with
girl now we talking
move your fucking body this is it
girl now we talking

I never follow those
Leading I'm on the road
dressed in designer wear
I make these people stare
I got no place to go
so I'm just moving slow
the weed is lit keep it low
inhale exhale the smoke
living like I don't care
dying's my only fear
the money be changing shit
I put that on my whip
switching lanes moving fast
hoping that I don't crash
this feeling going make it last
This feeling may be last

Fuck a pussy dude never trying pull you up
something like a hater how they wanna pull you down
but I don't ever really try to give them any fucks
but they wanna dap you when they see you in their town
stab you in your back better look both ways
I'm the type of person really wanna run you down
I don't like fakes, I don't share my j's
please don't expect me to pass hit round

People trying to see you never make it
Bulls wanna weight a youngin down,
but put faith in the music these critics be hating
but they just be jocking the sound

bimmer all black with the chrome wheels
Im deeping I don't wanna see a face
I just want to hit the open road and just go
I just take a moment just to let you that the bimmer go

That Bimmer drip down the road
I got a blunt thats rolled
I got no place to go
so I'm just moving slow
Until I get away
I got to find my way
Need me a better place
Somewhere in outer space

Let's get in some shit
cause we lit

Let's get in some shit because we lit,
girl now we talking
lets cruise in the city in the whip
you don't do this often
fuck your man I don't care who you with
girl now we talking
move your fucking body this is it
girl now we talking
