

# Sexual Attention

## 3t

How you like it now  
How you like it now, baby  
You need me  
You need me too, yeah  
I can't hide from things that you do to me  
Even though you deny every girl with me  
You say we're friends when I say that we're much more  
And how could I let go of what I've been looking for  
I can't let you take control of me  
(Oh no, no, no)  
I've gotta get you to give me what I need  
I need sexual attention, baby I should mention  
There's something that I need from you  
I wanna love and I need you to need me too  
Oh, sexual attention baby I should mention  
There's something that I need from you  
(Something that I need from love)  
I wanna love and I need you to need me too  
I can't see what you wanna get from me  
I give you good love and more, yeah, everything  
Can you give me one reason why we should be apart  
If I mean anything to you tell it to my heart, oh yeah  
I can't let you take control of me  
(Oh no, no, no)  
I've gotta get you to give me what I need  
I need sexual attention, baby I should mention  
There's something that I need from you  
I wanna love and I need you to need me too  
  
(I need, I need, I need)  
Oh, sexual attention baby I should mention  
(Sexual attention)  
There's something that I need from you  
(Something that I need)  
I wanna love and I need you to love me too  
(I wanna love, I need to love, hey)  
What I want from you is  
(Sexual I need from you, yeah)  
What I need for love right now

(Me to you, me to you, me to you and me, yeah, and me, yeah)

Sexual attention, baby I should mention

Is something that I need from you

I wanna love and I need you to need me too

(Said I need from you)

Oh, sexual attention baby I should mention

There's something that I need from you

I wanna love and I need you to need me too

(Girl you know I need you to need me)

Sexual attention baby I should mention

(Sexual attention)

There's something that I need from you

(Girl you know I need your love)

I wanna love and I need you to need me too

(Girl I need the love from you)

Oh, sexual attention baby I should mention

Is something that I need from you

I wanna love and I need you to need me too
