

So Let's Go

Alan Doyle

Watching the sand fall
Get you nothing like the hands on the clock wall
Oh, I love it when you standing up so strong
All you want is all a glow
Here we are in our own space
And I believe in every bright smile that I face
Keep 'em coming, 'cause I'm feeling the same way
Turn it on and off we go

We'll run till we fall, and the closing bells calling
We're only here for so long
We lead and we follow, tonight till tomorrow
We go when we go till we're gone

So it's done
So let's go
So, it's done
So, let's go

The long road is behind us
And we made it to the bright night that finds us
Altogether what is long and deny us, could be ours to know
Only I can see you moving
So let me hear it when you whisper I'm losing
And I can feel it when your heart beats the truth then
It's the only thing I know

We'll run till we fall, and the closing bells calling
We're only here for so long
We lead and we follow, tonight till tomorrow
We go when we go till we're gone

So it's done
So let's go
So it's done
So let's go

So it's done
So let's go
So it's done

So let's go

We'll run till we fall, and the closing bells calling

We're only here for so long

We lead and we follow, tonight till tomorrow

We go when we go till we're gone

So it's done

So let's go

So it's done

So let's go

So it's done

So let's go
