

Sun for the Night

IY

You don't have to ask
I don't have to say a word
We're sharing silence after all the years
It's all we haven't heard
You need not explain
I'd rather we don't make a sound
Listening brought love to the rest of my senses
And found a sun for the night

You burn away the fire
The streetlight and sunshine
Feeling a photograph
Erasing a black line
Sixty years and six steps behind
So forward now

The water transpires from my skin
And in the cloud I see your face
You're the world I'm living in
Feeling found I've found your face

You don't have to ask
I don't have to say a word
We're sharing silence after all the years
It's all we haven't heard
You need not explain
I'd rather we don't make a sound
Listening brought love to the rest of my senses
And found

Mmmm, and the memories fall like tears
Spreading joy with nervous signs
They bring me love in spite of the miles and the years
The end of our goodbyes

You don't have to ask
I don't have to say a word
We're sharing silence after all the years
It's all we haven't heard
You need not explain

I'd rather we don't make a sound
Listening brought love to the rest of my senses
And found
