The Pioneer

Channel Zero

Behind a uniform
Creativity of unique norm
Dedicated, test through time
Forced to give and give to live
Spending the night before the screens
Curiosity of human beings
Today the fall is in decay
The future lives and is on its way.Intensive surgery
Genetic work factory
Make no friends be suspicious
A woman spy can be vicious
One flash a day is not enough
Read books while others make love
My satisfaction has no level
Some say I created a devilMankind, undigested
needs the work of a pioneer track
Permanently occupied
The pioneer is seeking for a hit, yeah
and even if he spends a lifetime
Secret games
I construct and claim
Risks to discover
Experiment lover
Fusion material
Atom labelAccuracy patience
Energy tendency
Stimulate believing
Calculate searching
Control be sure
Test again examine
Take off leave
Action fireImprovement through research is positive
Novelties on the market change the way we live
Sometimes inventions lead to damage
among the human race
Progressed technology the industry doesn't
care about the safety measures
No more waste.
