

Make It Good

A1

When you're weary
When you're down and out
Lay your hands on me When you're weary
When you're down and out
Lay your hands on me Count my blessings, think of all I have
She never thought about it then threw it all away
Left it all to chance, she tore down fences
Now it seems so wasted, wish she could turn back time Now she's down on her knees to pray
Begging please, make it good, make it good somehow
She will do what it takes to change, someone please
Make it good, make it good somehow, someone please When you're weary
When you're down and out
Lay your hands on me She had a vision, time to make a stand
For all she used to be to turn her life around
To take back yesterday is never easy
When you're on your own, it seems impossible so Now she's down on her knees to pray
Begging please, make it good, make it good somehow
She will do what it takes to change, someone please
Make it good, make it good somehow, someone please Welcome to your revolution
What you dream is what you see
There's no rules, no regulations
Let the music set you free Now she's down on her knees to pray
Begging please, make it good, make it good somehow
She will do what it takes to change, someone please
Make it good, make it good somehow, someone please When you're weary
When you're down and out
Lay your hands on me When you're weary
When you're down and out
Lay your hands on me
