Recipe

Harmful

Hold me like I?m a baby
I will always be safe in your arms
I?m filming and I'm dreaming
I?m humming my way to the stars
I can reach the stars from where I am
I can reach the stars from where I am
Tell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermore
Stand by me I am your baby
You will always be safe in my arms
This season I don?t think about reason
I just wanna lose it and wish upon the star
I can reach the stars from where I am
I can reach the stars from where I am

Tell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermore
We can take it far, to the morning star
A thousand children laughing in your eyes
You were made for me, baby can?t you see
The endless sky is filled with butterflies
Tell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermore
Tell me what is the recipe, secret of eternity
No more love me or leave me
Not a year not three or four
Forever is in my heart with you evermore
