

# Recipe

## Harmful

Hold me like I'm a baby  
I will always be safe in your arms  
I'm filming and I'm dreaming  
I'm humming my way to the stars  
I can reach the stars from where I am  
I can reach the stars from where I am  
Tell me what is the recipe, secret of eternity  
    No more love me or leave me  
    Not a year not three or four  
    Forever is in my heart with you evermore  
    Stand by me I am your baby  
    You will always be safe in my arms  
    This season I don't think about reason  
    I just wanna lose it and wish upon the star  
    I can reach the stars from where I am  
    I can reach the stars from where I am  
  
Tell me what is the recipe, secret of eternity  
    No more love me or leave me  
    Not a year not three or four  
    Forever is in my heart with you evermore  
    We can take it far, to the morning star  
    A thousand children laughing in your eyes  
    You were made for me, baby can't you see  
    The endless sky is filled with butterflies  
    Tell me what is the recipe, secret of eternity  
    No more love me or leave me  
    Not a year not three or four  
    Forever is in my heart with you evermore  
    Tell me what is the recipe, secret of eternity  
    No more love me or leave me  
    Not a year not three or four  
    Forever is in my heart with you evermore
