

Long Road (Outro)

Havoc

I had to dig deep and go back
So I took the long road
No music playin, just my dogs tappin around like Morse Code
No navigational compass
Everything I accomplished - did it on my own
But wait, the higher power had to be in control
How I make out a shit hole
To express to the world
You tell em what I saw and expose my flaws
In dirt you gonna get that back
And that's 10 full
If you keep ignorin you fuckers
You'll make the same mistakes
Run up in the same place
But always appreciate where I came from
It made me who I am today
