# 10 Light Years Away

## Scorpions

In a run down bed and breakfast
A room with a view, across the river
I tried to lose the claustrophobia
Opened up and find Utopia, Utopia
There's no more denying
As my mind goes flying
10 light years away to save my soul
10 light years away to change it all
Whatever it may take I gotta try again
Girl, it's time to start over, 10 light years away
I'd been watching the reflection
Of a bamboo in the shade, when I saw her, oh yeah
A very hot day in Havana
In a midnight blue lagoon
So try, get excited
I knew she was hiding
10 light years away so take me home

10 light years away where I come from
Help me, find today, it's been way too long
Girl, it's time to start over, 10 light years away
There's no more denying
My mind, mind goes flying
10 light years away to save my soul
10 light years away to change it all
Whatever it may take I gotta try again
Girl, it's time to start over
10 light years away so take me home
10 light years away where I come from
Help me find today, it's been way too long
Girl, it's time to start over
10 light years away to save my soul
10 light years away to change it all
Whatever it may take I gotta try again
