

Colony

In Flames

It's your world, the day is a threat
In my world, there is an absence of light
 Genetic superior cell
Controlled by the fathomless and unbearable
 A radical new form
 Of plastic and rage
 Biologically optimized
 But with a strangling pulse
And your world, do you find me worthy?
 In my world, I parachute my life
 A virtual drugstore
Populated by the fathomless and unbearable
 Machine, meat and blood
 In an intimate relationship

 The new, superior
More effective than all the preceding
 When we can no longer cry
 Reality is torn
 Then it's easy to forget
That the responsibility lies on us all
 When we can no longer cry
 Reality is torn
 Then it's easy to forget
 That the responsibility lies on us all
I reach your world, the night is no threat at all
 Darkness transforms to a vision of hell
 Populated by the fathomless, unbearable
