

Life's Too Short

[Josh Kelley](#)

Today I'm fine to breath
Find out what it means to make it out alive
Woulda, shoulda, coulda
Didn't walk beyond these lips
Today I die, oh Lately I've been thinking that life's too short
To make a living way too long
No I never seen anything run so fast this time
And the second that you catch it it's already across the finish line
Then every moment, I'm gonna own it
Cause once they're gone, they're gone
Life's too short to make a living way too long
Rat racing and the mighty dollar won't be there to lay you in the
ground
The truth has always been there waiting patiently for me to come around
Lately I've been thinking that life's too
short
To make a living way too long
No I never seen anything run so fast this time
And the second that you catch it it's already across the finish line
Then every moment, I'm gonna own it
Cause once they're gone, they're gone
Life's too short to make a living way too long
