

# Snowprints

Jack Shaw

This is somewhere I've never been,  
and I'm glad you're here.  
Days gone longing for something to appear.  
And some snowprints were made.  
And some snowprints were made.

Took a long, long time  
and it never changed, never changed.  
Head rocked with what ifs and eyes in the head lines.  
Through the snow and the storm, I will see you, on that night,  
and some snowprints were made  
and some snowprints were made  
Never been kissed like this before, never been kissed like this before.

Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, never been, never been kissed like this.  
Never been, and some snowprints were made.  
And some snowprints were made.  
And some snowprints were made.  
And some snowprints were made.  
And some snowprints were made.
