Star Of All The Planets

Ryan Malcolm

Don't you know you're beautiful?
The light you shed, it overflows my eyes
Can't take your blinding glow
No, oh no
If I could break into your mind
I'd leave a note that said that you were like
The star of all the planets out in the sky
Tell me why
Don't you feel lovely? Don't you feel bright?
You've got that something
I only wish you could see
How lovely you are to me
Oh, you're lovely
If you could spy with your pretty eyes
What I can see as your very own satellite
Maybe you would get it and you'd realize, oh
You're the star of all the planets out in the sky
Tell me why
Don't you feel lovely? Don't you feel bright?
You've got that something
I only wish you could see
How lovely you are to me
How lovely you are to me
Oh, you're the star of all the planets of the sky
You're the star of all the planets of the sky
You shine so bright
Don't you feel lovely? Don't you feel bright?
You've got that something
I only wish you could see
How lovely you are to me
Don't you feel lovely? Don't you feel bright?
You've got that something
I only wish you could see
How lovely you are to me
