

Take Me to a Dream

Kelly Price

Love of my life you are, sunlight, my shining star
All of the world to me all I could ever need
Lately I can feel you've grown away from me
And inside I pray it's not too late to find a remedy
Don't wanna live a lie, I don't wanna say goodbye
So how can I start again and how will my heart mend
And here I am alone with only memories
So I'm searching just to find a way to keep you here with me
So I close my eyes and I go back in time
When our love was strong before our hearts went wrong
I keep holding on to how it used to be
So lay me down and take me to a dream
Dreams that you're holding me, dreams that won't ever be
Visions of loving you and wanting to make them true
I find myself believing you'll come back to me
'Cause I'm trying not to feel the pain that loneliness can bring
So I close my eyes and I go back in time
When our love was strong before our hearts went wrong
I keep holding on to how it used to be
So lay me down and take me to a dream
It's so hard to make it through the day without you
So I pray for night to dream you're here with me, with me
So I close my eyes and I go back in time
When our love was strong before our hearts went wrong
I keep holding on to how it used to be
So lay me down and take me to a dream
So lay me down and take me to a dream
