Outside Looking In

Stealers Wheel

It looked so good from the outside, I couldn't wait to join the crowd
It all looked different on the inside
It must have been my imagination
I felt so sure that was where I wanted to beI thought I'd get out of the city, I took a trip down to the sea
I didn't stay too long 'cause there was nothing there but sky and ocean
Oh yeah, it must have been my imagination
I really thought that was where I wanted to beLooking for something that might have some meaning
Looking for something that might make me feel alive
Looking around for the right situation
Where I can believe what's happening right in front of my eyesI think I'll stay in one position, and just leave well enough alone
I'm never satisfied 'til I've been disillusioned
Oh yeah, it must be my imagination
I always think there's a better place to beLooking for something that might have some meaning
Looking for something that might make me feel alive
Looking around for the right situation
Where I can believe what's happening right in front of my eyes
